PREFACE

In presenting the 21st Edition of the Essex, Kent and Lambton County Directory, we trust it will meet with the cordial approval of our patrons, as every means has been taken to render it up-to-date and as accurate as possible.

Thanking those who have kindly given us information; also the business people and the public generally who have given the work their support, we remain, respectfully yours,

HENRY VERNON & SON,

Publishers,

We quote Special Prices to Clubs, Institutions, Parks and others who require seed in large quantities.

BOOK ON LAWNS AND GREENS

LAWNS AND GREENS

It is most important that the lawn should be sown with a mixture of grass seeds especially adapted for the purpose required. A mixture suitable for a Park or Golf Course would be quite unfit for a private lawn, Bowling or Putting green. All the finest grasses that are most suitable for the formation of a lawn when grown for seed, produce very much less weight of seed per acre than do the coarser growing varieties, consequently the cheaper the mixture the coarser the turf. We maintain that the finest dwarf growing grasses are the most economical even for large areas, as the turf formed by the dwarf compact habit of the finest grasses requires to be mown only about half as many times as a turf formed of coarser growing varieties.
